Aarohan Build & Interiors

Materials, Finishes & Brand Specifications

Knowledge Base Document 05 | Version 1.0 | Effective 1 November 2026

Board and surface materials

• Kitchen carcass: 18 mm BWR plywood in wet-prone zones; approved HDHMR may be used in dry zones when specified.

• Shutters: 1 mm decorative laminate as standard; acrylic, membrane and PU finishes are optional upgrades.

• Edge banding: machine-applied PVC edge banding, typically 1–2 mm depending on location and design.

Hardware and brands

• Standard hardware may include Hettich or Ebco equivalent models, subject to availability and written approval. Premium upgrade options may include Blum.

• Electrical accessories: Anchor by Panasonic or equivalent approved series. Wires: Polycab or Havells, subject to BOQ and availability.

• Plumbing fittings: Jaquar or Cera standard ranges may be quoted. Brand name alone does not define the exact model; the BOQ must specify model/series.

Materials, Finishes & Brand Specifications — continued

Stone, paint and ceiling

• Countertops may be granite or quartz. Quartz is an upgrade and its shade/veining varies by batch.

• Interior paint: Asian Paints or Berger standard emulsion range, with primer and putty as per surface condition.

• False ceiling: 12.5 mm gypsum board on suitable metal framework in standard dry interiors. Moisture-resistant boards are recommended in selected humid locations.
